

K2

The Electric Friends Tracks for the T2 Trolley series features:

- Low profile, only 25 mm, for easy recess into the floor
- CNC milled aluminum with 0.01 mm precision
- Up to four Trolleys per track
- Central extruded rubber rail for Trolley steel wheels minimizes rubber wear
- QR code provides precise positioning for AR and VR systems
- Any straights or curves, minimum R=290 cm (outer track)
- Max length track 30 m
- Track with 785 mm/cc wheels 700 mm
- Standard RAL 9005 Black powder paint with 17% gloss or Black anodized. Variety of colors in powder coating, or anodized aluminum. For other colors please indicate your RAL code

Each track pair includes inner and outer rails, couplers to next rail and spiral pins for couplers, Each Kit includes rubber rail, QR-tape, 4 end-stops, spiral pins for end-stops and tube of joint compound.

The cable groove with QR code cannot be utilized if rail line include a convex curve toward the scene. In such case maximum two trolley on the rail line.
